

## AMERICAN QUARTER HORSE

The American Quarter Horse is one of the most popular breeds in the United States, especially out West! They get their name for being the fastest horse to run a quarter mile. Unlike the Thoroughbred who can run really fast for long distances, the Quarter Horse can run super fast for short distances. This makes them very good at chasing cattle and running barrels! JHTR has two quarter horses in the herd, Buckwheat and Taco! Quarter Horses come in all different colors, Buckwheat is a buckskin while Taco is a sorrel or chestnut which is a light brown. Both Buckwheat and Taco love to help participants of all abilities learn to ride from those who are learning to ride to those who are riding independently!
