

HAFLINGER HORSE

The Haflinger is a breed of horse that originally came from Germany! They are usually short, stout and chestnut (light brown) with a white mane and tail. Haflingers are very strong and can be excellent riding horses or even pull a cart! JHTR's horse Henry is a Haflinger! He lives up to his breed because he is short but strong with a chestnut coat and white mane and tail. Henry is one of the only horses at JHTR who is always on a diet! He loves to sit and eat all day with his best friend Taco, so we make sure he does not get a stomach ache from eating too much! Henry loves to teach participants who are getting ready to ride independently!
